

# Nature's Perfect Statin

This powerful Linus Pauling-inspired cholesterol reducer is safe, proven – and perfectly natural!

**Free Shipping on First Purchase.**

As part of a new promotional campaign, you are invited to try a jar of *Nature's Perfect Statin* – Tower Laboratory's *Heart Technology*<sup>™</sup>, and receive **free shipping**. The product is an *Lp(a) Binding Inhibitor* that combines antioxidants such as Vitamins **C**, **E**, and **A** with amino acids such as *proline*, *lysine*, and *arginine*.

## Original Statin

All statins – natural or artificial – lower cholesterol by blocking the same essential enzyme. In 1985, Harwood, et. al., discovered that ascorbic acid (Vitamin C) is the human body's natural HMG-CoA reductase inhibitor, without the liver-destroying potential. When Vitamin C levels are low, the body compensates and manufactures more cholesterol. When serum levels are high, Vitamin C inhibits HMG-CoA reductase, which predictably lowers cholesterol.

Unlike the artificial statins such as Lipitor® and Zocor®, Vitamin C *protects* the liver, *increases* CoQ10, and *reduces* Lp(a) – which *hundreds of studies have identified as the true culprit in cardiovascular disease.*

## Fast Results

*"I've never seen such a drop in cholesterol numbers . . . If cardiologists knew this, they would be recommending Pauling's therapy to all their patients."* – William Cook's Cardiologist

After William Cook of Louisville, KY, suffered two heart attacks and a triple heart by-pass operation he elected natural cholesterol reduction. Declining medical advice to begin a cholesterol-lowering drug, Cook began taking Tower *HeartTechnology* in mid-April of 2002. *"In 8 months Bill's cholesterol dropped from 246 to 164 and his LDL dropped from 163 to 101, all on (Vitamin C) and . . . Tower HeartTechnology."*

## Therapy Made Easy

Dramatic cholesterol reduction has never been simpler. Patients are far more likely to be long-term compliant because Tower

*HeartTechnology* is . . .

- **A pleasant-tasting drink mix** – enhanced with stevia.
- **Very convenient** – one jar replaces dozens of different pill bottles.
- **More affordable** – compared with ingredients purchased separately as pills.
- **Resistant to dosage errors** – replaces over 500 pills of several varieties monthly.
- **Pure** – no fillers, glues, binders, or additives to hold pills together.
- **Satisfaction guaranteed** – money is refunded on request.

## It Works!

Patients easily attain Pauling's recommended preventive dosage, and 2 to 3 daily drinks provide maximum benefits.

**Don't miss this limited opportunity to find out more and receive the first jar with FREE SHIPPING.**
